6th International Symposium on Natural Resource Management

A country's economic development is based on the intensified exploitation of natural resources with the aim of acquiring raw materials and energy. There are two issues related to this phenomenon: depletion of nonrenewable natural resources and pollution of renewable natural resources. Bearing in mind that the depletion of nonrenewable resources is unavoidable, it is necessary to create a system of alternative energy sources, which will ensure uninterrupted energy supply.

The environmental pollution is yet another problem the modern society faces. As the world's population grows and the economic growth and development increase, the environment is under higher and higher pressure. On one hand the demand for fresh water and food is soaring; on the other, the quantity of waste is growing and it has to be disposed somewhere as the decomposition of waste materials may take several decades.

Climate change has become the central issue after the Paris UN Climate Conference. It is necessary to define the appropriate mechanisms and strategies which will regulate and improve the current state in order to ensure human survival.

There are indeed many issues and topics related to natural resource management which are interesting and popular today. So far we have discussed global issues; however, when dealing with Serbia itself, these issues are not of less interest.

The Faculty of Management in Zajecar organizes the 6th International Symposium on Natural Resource Management with the aim of emphasizing the key issues, drawing conclusions and finding the optimal solutions to afore mentioned problems. We hope that different people from economic and scientific spheres will ensure useful exchange of ideas and opinions which will further help see the real situation in the field and find adequate scientific solutions.

PRESENTATION - SYMPOSIUM VENUE

The Sixth International Symposium on Natural Resource Management will be held June 25-26, 2016 at the Faculty of Management in Zajecar at bb Park Suma Kraljevica, Zajecar, Serbia

PROGRAM - TOPICS

- Energy resource management
- Management of tourism resources
- Agricultural resource management
- Mineral resource management
- Economics of natural resources and the environment
- International trade and the environment
- Natural resources and the economic development
- Environmental pollution and protection
- Global climate change
- Waste management
- New technologies and innovations in natural resources
- Social aspects of natural resource management
- Life-long learning and sustainable development
- Social entrepreneurship
- Organic production

REGISTRATION

The authors are invited to register by sending completed registration forms by January 31, 2016 latest.

The papers are to be sent either in Serbian or in English by April 29, 2016 latest.

The scientific committee will review the submissions and send a notification of acceptance by May 27, 2016. The registration fee to the symposium is to be made by June 10, 2016.

The papers not dealing with the topics or not arranged properly will not be considered.

The English translation and the data presented in the papers are the responsibility of the authors themselves.

Please submit your registration form and papers at: simpozijum@fmz.edu.rs

OFFICIAL LANGUAGES

The official languages at the Symposium are Serbian and English.

INSTRUCTIONS FOR AUTHORS

One author may submit two papers most. The paper is not to exceed 8 pages. The authors are required to use the template enclosed in the attachment. Papers may be submitted by university teachers, institute researchers, economic experts or master /PhD students. The maximum number of authors per paper is THREE. The papers which do not follow the above mentioned instructions will not be considered.
